exquisite stone interiors

INNOVATION LAB

A creative hub where designers, artists and technicians develop **new interpretations of marble: we transform slabs into canvases, nature into art.**

Thanks to our tireless research and development work, **we are able to overcome all stylistic and technological barriers to create tailor-made collections, marble as you have never seen it before.** We sculpt the material in original ways: one-off pieces or limited edition numbered series of 3D coverings and furnishing accessories.

IPOGEO® COLLECTION

With **Ipogeo®**, natural stone is shaped like a fabric to become "tactile," the Innovation Lab collection that was born inspired by the origin of natural stone as if it had just been quarried. **Ipogeo®** is a journey of discovery that represents marble as it has never been seen before offering endless possibilities for interpretation, making each processed slab a unique piece.

The veins and fossils in the marble are enhanced while respecting nature's design through an imaginatively applied artisanal process.

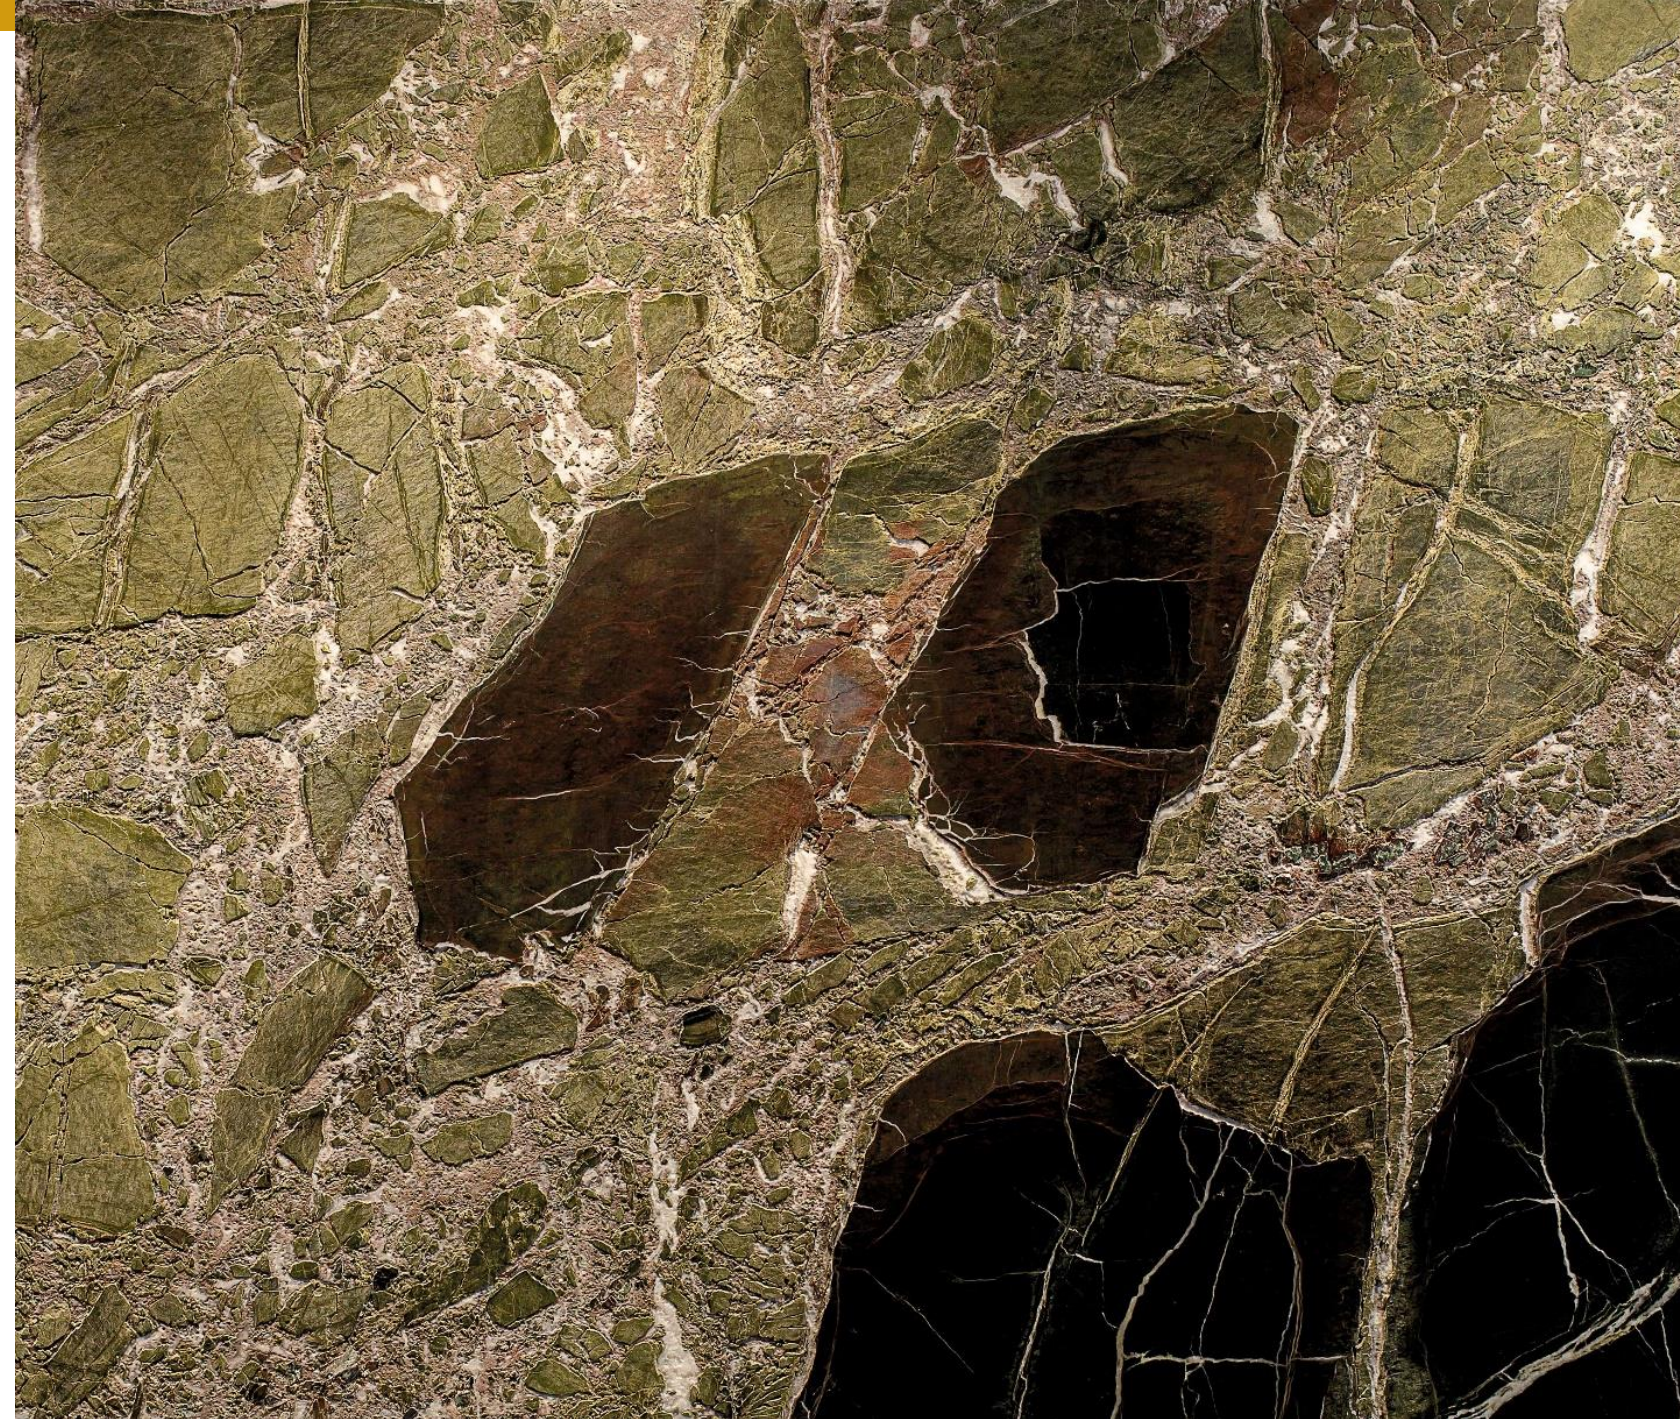

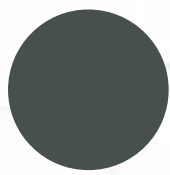

marmivrech

AUTHORIZED EXCLUSIVE DISTRIBUTOR
OF IPOGEO® - MARGRAF
FOR MARINE AND YACHTING

This finish celebrates the union of natural stone, a material sculpted by humans for millennia, with the innovative processing concept of Margraf Innovation Lab. The aim is to highlight the natural origins of the treated material, as if it had just been extracted from the quarry.

With Ipogeo®, marble transforms and is shaped as if it were clay, striving to evoke sensory stimulation by accentuating its unique veining and diverse color palettes.
